

# SWE UCR

*Winter Recap*

# Engineering R'Future

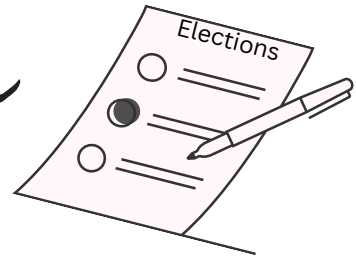

JANUARY 28, 2023

Organized by our Outreach Lead, Uma, Engineering R'Future is a day for high school women to learn about engineering and its versatility and importance as a study and career option. The students got a feel for our UCR campus as they toured around engineering buildings, talked with SWE officers, and learned about engineering through hands-on activities. The day started off with a talk and presentation by Mechanical Engineer at Boeing, who spoke about her journey and career in engineering.

The students also had fun making their own paper airplanes! They learned how to do some physics calculations with velocity and distance. ERF gives young women the opportunity to discover engineering and get a glimpse of its importance to the world and how they can make a difference! The day ended with an Aerospace Systems presentation by 4th year Electrical Engineering student, Vincent Le.

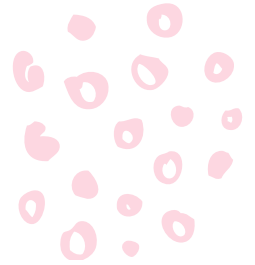

# General Meetings

## **GM 1: 1/23**

*SWE Mixer*

SWE members get to know each other and officers.

## **GM 2: 2/6**

*Officer Panel*

SWE officers shared an overview and their experience in SWE.

## **GM 3: 3/5**

*SWE Elections*

Applicants gave their speeches and members got to vote for their 2023-24 officers.
